

Amendments to the Specification

Please amend Paragraph [0036] as follows:

As shown in FIG. 2, the display system according to the present invention includes a plurality of first electrodes 25 formed in line in the same direction, a plurality of second electrodes 27 formed in light in a direction perpendicular to the first electrode, liquid crystals having hologram patterns formed in a pixel 26 28 area between the first and second electrodes 25 and 27, an optical waveguide 20 for transferring light to the pixel 26 28 area, and a light source 21, located in a side area of the optical waveguide 20, for generating the light.

Please amend Paragraph [0037] as follows:

The display system according to the present invention further includes one or more driving units 29 for driving the first and second electrodes 25 and 27, and a control unit 20 for controlling the driving units in accordance with a video signal inputted from the outside.
